DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-22, drawn to a rotary valve, classified in class 251, subclass 214.
 - II. Claims 23-32 are, drawn to a method of constructing a seal cartridge, classified in class 29, subclass 450.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product (rotary valve) can be made by a materially different process. For example instead of subjecting the first sealing cartridge to forces resiliently deforming it, the first seal cartridge could be formed with the desired shape prior to insertion into the seal cartridge.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. A telephone call was made to Richard Konneker, Reg. No. 28,867 on April 11, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
